

EFN Policy Statement

Recruitment

There is a global shortage of health workers and a shortage of nurses within the EU. The consequent competitive recruitment of scarce nursing resources has led the European Federation of Nurses to call on the EU to:

- Adopt the International Council of Nurses' 'Ethical Nurse Recruitment Framework';
- Establish a Workforce Monitoring Forum to make predictions for future trends in nurse migration;
- Work with national nursing associations to address the current crisis of recruitment and retention of nurses in Europe.

Please contact **Mr. Paul de Raeve**, General Secretary of the European Federation of Nurses Associations for more details on this issue.
